

OnlyFreshers Complete Flow Blueprint

Company, Direct Mode, Fast Track, Training Partner, subscriptions, dates, and hiring.

Readable build reference - generated on 29 August 2026

How to read this PDF

This document explains the full product journey as one connected system. Use it as a product flow reference while building screens, APIs, database fields, and validations.

[Website](#)[Company](#)[Direct Mode](#)[Fast Track](#)[Training Partner](#)[Certificates](#)[Subscriptions](#)

One Connected End-to-End Flow

Complete platform journey

Actor wise system map

Actor	Starts	System Gate	Output
Website	Home, jobs, courses, direct mode, fast track pages	Public browsing and route selection	User enters correct role flow
Company	Register and profile	Admin approval plus credit balance	Post jobs and hire candidates
Direct Fresher	Register, profile, resume, initial test	Credits and active job deadline	Apply directly to company jobs
Training Partner	Register, profile, course creation	Admin approval and course status	Train, track, certify freshers
Fast Track Fresher	Course enrollment and payment	Training completion plus final test	Certificate plus Fast Track applications
Admin	Admin login	Approvals, statuses, assessments	Platform control and monitoring

Company Flow With Subscription Link

From registration to paid job posting

Company subscription connection

- Posting link: /company/post-job.
- Billing link: /company/billing.
- Payment purpose: company_subscription.
- After successful payment: job_credits increase and subscription_plan is saved.
- After payment redirect: /company/post-job.

Direct Mode Flow With Credit Subscription

Direct candidate to company

Direct Mode subscription connection

- Payment purpose: direct_mode_subscription.
- Plan adds credits and validity days.
- System saves direct_mode_subscription_plan, direct_mode_subscribed_at, and direct_mode_subscription_expires_at.
- After successful payment redirect: /direct-mode/dashboard#credits.

Training Partner and Fast Track Connection

Partner course to certificate to hiring

Fast Track link points

- Training Partner links to Fast Track by publishing courses.
- Course enrollment links fresher to Training Partner.
- Progress and final assessment link training to certificate.
- Certificate links fresher readiness to Fast Track hiring.
- Fast Track hiring links certified freshers back to Company applications.

How Fast Track Links Back To Company

Certified fresher reaches employer

Custom Date and Deadline Logic

Application last date behavior

Build note for custom date UI

- Use date input in company create/edit forms.
- Set min date to today on frontend.
- Keep backend validation as final source of truth.
- Show deadline on job cards and job details.

Unified Application and Hiring Flow

After application is submitted

Payment Purpose Map

What each payment does

Actor	Starts	System Gate	Output
Company	Low job credits or package purchase	Razorpay verify	Add job credits and save company plan
Direct Fresher	Low Direct Mode credits or plan purchase	Razorpay verify	Add direct credits and save expiry date
Fast Track Fresher	Course enrollment fee	Razorpay verify	Mark enrollment paid and enrolled

- Company plans add job posting credits.
- Direct Mode plans add fresher application credits plus subscription validity.
- Course payments connect fresher to Training Partner course and unlock training journey.

Build Checklist

- Website pages should route users clearly to Company, Direct Mode, Fast Track, Training Partner, and Admin flows.
- Company profile save should create pending approval state and initial credits.
- Admin approval should unlock company and training partner dashboards.
- Job post form should support hiring_mode, status, and application_last_date.
- Publishing active job should deduct company credits and redirect to billing when insufficient.
- Direct Mode apply should require profile, resume, initial assessment, active job, valid date, and credits.
- Fast Track should connect course enrollment, course payment, progress, final assessment, certificate, and job applications.
- All payment flows should create Razorpay order, verify signature/payment, update business records, then redirect correctly.
- Notifications should be created for registration, approval, application submission, status changes, interviews, and enrollment.
- Company applications should combine Direct Mode and Fast Track candidates in one hiring pipeline.
